

Agusto & Co publishes results of Mutual Fund Performance review.

Agusto & Co (“the agency”) has completed a review comparing the performance of selected open ended collective investment schemes, against an agency calculated benchmark.

The review covers a period of one year from May 2008 to May 2009; and discusses the impact of concentration, volatility and liquidity on relative performance, among others.

The report, which is available to download at <http://www.agusto.com/agusto/reports.php>, also contains individual fund profiles of each of the 12 mutual funds reviewed.
